Section A: Personal Details

Amar Hassan Khamis, PhD, DEA, C.SBM. BSc.

471 moorlands crescent. N2P 0E1 Kitchener / Ontario Email: <u>amar.hassan@mbru.ac.ae</u> Cell: +1(519) 574 6773/+971501415808 ammmarhasssan@hotmail.com

Section B: Professional Record * teaching language English					
Job Rank	Specialty	Institution & Country	From	То	
Professor	Biostatistics	*Hamdan Bin Mohammed College of Dental Medicine, Dubai. Mohammed Bin Rashid University of Medicine and Health Sciences Main language of teaching is English. <u>http://mbru.ac.ae/</u>	17 January 2018	Present	
Professor	Biostatistics	Ajman University	September	December	
Adjunct		Teaching Biostatistics and Research Method for MSc. Oof Dentistry for 3 programs	2022	2022	
Associate Professor	Biostatistics	*Hamdan Bin Mohammed College of Dental Medicine, Dubai. Mohammed Bin Rashid University of Medicine and Health Sciences	13 July 2014	16 January 2018	
Professor	Biostatistics: Recommended to be Promoted to a full- professor, Meeting No.10, 30 March 2013 Department of family & community Medicine	*College of Medicine, University of Dammam, KSA. Main language of teaching is English <u>http://www.uod.edu.sa/en</u>	April 2014	7 July 2014	
Associate	Piestatistics	*College of Medicine, University of	July 2009	March 2014	
Professor Associate Professor	Biostatistics	Dammam, KSA *Faculty of Medicine, University of Khartoum, Sudan. Main language of teaching is English.	February 2006	July 2009	
Associate		http://meduofk.net/ School of Medicine, Ahfad		February	
Professor	Biostatistics	University for Women, Sudan.	April 2004	2006	

		Main language of teaching is English. <u>http://www.ahfad.org/history.html</u>		
Assistant Professor	Biostatistics	School of Medicine, Ahfad University for Women, Sudan	November 1997	April 2004
Scholarship Grants from French Embassy and INSERM U 399, Marseille, France	Biostatistics	University of Méditerranée AIX Marseille & University of Gazira (sandwich program)	September 1997	April 2003
Research Assistant	Field Coordinator	French Embassy, Khartoum, Sudan	September 1996	April 1997
Research Attachment	Biostatistics	INSERM U 169, Faculty of Medicine Le Kremlin-Bicêtre University of Paris XI, France	September 1994	September 1996
Scholarship of Government of France (BGF)	Biostatistics	Faculty of Medicine, University Paris XI, France	September 1990	September 1994
Teaching Assistant	Statistics/Mathematics	School of Mathematical Sciences, University of Khartoum, Sudan	November 1988	September 1990

Section C.1: Academic Qualifications						
Academic Degree	Specialty	Institute	Country	Date Awarded		
PhD	Biostatistics & Genetic Epidemiology	University of Méditerranee AIX Marseille & University of Gazira (sandwich program); no courses	France & Sudan	2003		
DEA (PhD)	Biostatistics	University Paris XI	France	1994		
Certificate (SBM)	Medical and Biological Studies: option of epidemiology and biostatistics	University Paris XI	France	1991		
Diploma	French Language	University of Clermont	France	1990		
B.Sc.	Statistics & Computer Sciences	University of Khartoum	Sudan	1988		
Section C.2: Language Proficiency						
Arabic: mother t	congue					
English: speak, v	vrite & read (excellent)					
French: speak, w	vrite & read (very good)					

Section C.3: Computing Skills

SPSS daily basis

Stata daily basis

SAS occasionally

Comprehensive Meta-Analysis (CMA) all the time

R-language all the time

Power BI occasionally

Section D: Training Courses (Public Health)

Meta-Analysis Concepts and Application. London, UK May 11-13, 2015

Eastern Mediterranean Regional Tobacco Control Leadership Program. Johns Hopkins Bloomberg

School of Public Health (JHSPH) and the World Health Organization Eastern Mediterranean Regional Office (WHO-EMRO) from 26-30 November 2012 in Cairo, Egypt.

Training course in Population Size Estimates of Most at Risk Populations: Methods and Lessons Learned around the World, from 9-13 July 2012, in Zagreb, Croatia

Course of Health Management. Liverpool School of Tropical Medicine 8-11 June 2009. Liverpool. UK

Training Course in Biological and Behavioral Survey in Hard-to-Reach Populations using Respondent-Driven Sampling, 3-7 November 2008, Zagreb, Croatia.

Course of Accelerating Progress Towards the MDG's and other Health Outcomes, Washington, USA, 20-31, 2006:

Problem based and community-based concepts. During the period 1995 to 1996, many times Maastricht University, Netherlands and University of Suez Canal, Egypt.

Evidence Health Based, Meta – Analysis Oxford University February 2018

Mixed Method, Oxford University February 2019

Section E: Academic Activities

• Undergraduate Teaching

<u>Mathematics courses</u>: Calculus, Algebra, Basic Mathematics, Several Variables Discrete Mathematics, Operations Research, Differential Equations

<u>Statistics courses</u>: Basic Statistics, Inferential Statistics, Stochastic Processes, Sampling Techniques, Applied Statistics and Regression

<u>Biostatistics courses</u>: Fundamentals of Biostatistics, Descriptive Epidemiology, Fundamentals of Genetic Epidemiology, Research Methodology

• Post Graduate Courses:

Advanced statistics courses, Biostatistics, Epidemiology, Meta-Analysis, Clinical Trial, and Research Methodology

- Administered and taught professional advanced courses on Respondent Driven Sampling, Meta-Analysis, and Advanced Biostatistics to special groups of interest.
- Delivered research methodology workshops for postgraduate candidates in pre-medical studies, medicine, and public health.
- Conducted many surveys as field coordinator in Africa, Asia, and Arab countries.
- Supervised Higher Diploma, MSc and PhD students in biostatistics and epidemiology topics and participated as co-supervisor in many theses on medicine and pre-medical sciences.
- Published not less than 69 articles in different disciplines concerned with health, biostatistics, and epidemiology.
- Pioneered in Africa as a changing point of accelerating progress towards the Millennium Development Goals (MDGs).
- Scientific journals editorial contribution in the field of biostatistics and epidemiology, and reviewer for reputable scientific journals.
- Member of research ethics committee in different institutes in Sudan, Saudi Arabia and UAE.
- Member of Board of research committee ALBASAR International Foundation (2010 to date)
- Consultant for WHO EMRO, conducting many missions in the region of EMRO.
- Member of international scientific associations such as LHL (Norwegian Health and Lung Patient Organization), INSERM (French Institute of Health and Medical Research).
- External examiner for Universities in Ethiopia, South Africa, Sudan, and Saudi Arabia.

Section F: My Experience in Public Health

In October 1983, when I was accepted at the Computer Sciences section of School of Mathematical Sciences, University of Khartoum, which was my preferable field to study. Since that time, my focus was also directed towards Statistics. As it was not possible to study one subject independently, I combined Statistics with Computer Sciences; in particular my high-grade rank increased my chances for taking such a competitive combination. as my field of study and I was the first of five colleagues selected for professional Statistics and Computer Sciences. After my graduation on 11 November 1988, I was appointed as a Teaching Assistant at the College of Education, University of Khartoum.

On 25 September 1990, then I accepted a one-year teaching position at Ahfad University for Women (AUW), and later, on 25 of September 1990, after working for one year, I was awarded a scholarship from the Embassy of France for, so I relocated to Paris to prepare my postgraduate studies. I spent one year studying the French language at CAVILAM, Department of French Language University of Clermont Ferrand. Then, in October 1991, I was accepted at The University of Paris XI to pursue a DEA of Public Health. Professor Joseph Lellouch asked me to prepare a Certificate of Medical Studies under a program of Life Sciences at the Faculty of Medicine, University of Paris Faculty of Medicine, and to work as a Research Assistant at the same time in the unit of the" INSERM 169 at L'Hopital du Paul Brousse Villejuif", as a prerequisite requirement for being fully accepted condition of acceptance. I completed my certified study successfully, and then in September 1992, I was so I was accepted at the biostatistics section of the program of DEA of Public Health program option of biostatistics, in September 1992. I completed my thesis and worked for one year, during my time as a Research Assistant at the hospital until I received my DEA on September 1994.

In October 1994, I returned to my position as a lecturer at the College of Medicine, AUW, as a Lecturer at the College of Medicine. The college of Medicine was one year of age and affiliated to Maastricht University in Netherlands. The philosophy of the College was problem based and community-based concepts. This was the first College of Medicine in Sudan to follow this system after the University of the Suez Canal in Egypt. We were very fortunate to be well trained at Maastricht University and to use their system to be exposed to the field of work and to the philosophy of family attachment; community-based teaching and rural extension.

We worked hard in the field of reproductive health with the community in Sudan, which, at that time who suffered a high rate of child and maternal mortality due to detrimental and harmful traditional practices such as Female Genital Mutilation (FGM) or female circumcision. We wrote a project to the UNDP and we received a large fund, under the supervision of the regional office of the WHO in Sudan, with the aim to fight against FGM and other harmful reproductive harmful practices in Sudan. I was the field coordinator, and along with other team members we were able to establish social laboratories in the two areas of where we used Umbadda and Alserourab in the outskirts of two areas around Omdurman, the largest city of the three towns' capital. which is within the capital of Sudan, as social laboratories. We applied the program in these areas to empower women, activate the role of social community leaders and introduce the institutes and people to the idea of partnership. The program was completed successfully and during our work, the indicators showed decreased rates in the rate of child and maternal mortality, was being minimized and the rate of harmful traditional practices was reducing. By the time we had finished, a new law criminalizing and punishing these detrimental practices was approved by the Sudanese Parliament to prevent the practice of female circumcision, making it punishable. We also gave formal training to the traditional midwives. Personally, my involvement in this program offered me the chance to be trained in some International Institutes and by recognized experts in the field of Public Health. I attended a number of training programs including "The Millennium Development Goals for Health: Raising the Challenges" at the World Bank at Washington, USA, "Health Management" at the School of Tropical Medicine, Liverpool, and the "Workshop of Responding Driving Sampling" (RDS) at University of Zagreb, Croatia as well as many workshops and seminars in Morocco, Cairo, Geneva and Bergen, Norway. I continually and routinely met with scientists in the field of Public Health, continually to learning from their personal communication and expertise with them.

I had further activities during my work at AUW. I had a partnership relationship with the National Tuberculosis program and The Sudanese National AIDS Program (SNAP). I was one of the advisors in Statistics and Research, which widened my network with health professionals who are well known in their field. I gained experience to work particularly in the field of Infectious diseases, communicable Diseases and in Health in general.

As I had graduated from France, I had very good relations with the French Embassy in Khartoum. Only few Sudanese had completed their study in France due to language limitations, so I was invited by the French School in Khartoum to help the students in Physics and Mathematics. At that time, I met with Professor Allan Dassin, Director of the unit of the INSERM 399 Marseille, who had a project at Al-Gezira, a city in central Sudan where there was the world's largest project of cotton cultivation. The main goal of project was to look for a major gene susceptibility and resistance to periportal fibrosis among people having *Schistosoma mansoni*". Professor Dassin asked me to join the project as there was an opportunity to gain a scholarship position for pursuing a to prepare for a PhD. I immediately accepted the offer and then appointed as this and became a field coordinator in the area of Umzoukra, a village in Al-Gezira state in Central Sudan. As I was the only person individual to have a French Diploma in DEA of Public Health, which made me eligible and have the eligibility to be accepted by French Institute. They asked me to pursue prepare my PhD as a Sandwich program between Al-Gezira and University and of AIX- Mediterranean Marseille. I accepted the proposal and the project became a part of the title of my

PhD. From 1997 to 2003, I worked as a coordinator on four sites as a coordinator at Umzoukra, where I drew the pedigree of the families by collecting blood samples and travelling with them to Marseille, where I performed extraction of the DNA, purification, PCR and sequencing in the laboratory. I performed this over a six-year period until I completed my data collection and analysis and was eventually awarded my PhD in genetic epidemiology.

Throughout this period, I continued my normal duties throughout this period as a member of the College of Medicine at AUW Ahfad University in partnership with a TB program and a Researcher at the Ministry of Health. After I completed my PhD, I became Assistant Professor at AUW Ahfad University for Women until 2006.

I then moved to the College of Medicine at the University of Khartoum in the Department of Community Medicine to establish several programs at a of Postgraduate level of study, namely Masters of Community Health, PhD in Community Health, Masters of Community Medicine and PhD in Community Medicine. I have always been proud to have joined the University of Khartoum, a university that was established in 1902, and I was one of its undergraduate students where I had completed my undergraduate studies. I also became part of the success story by establishing a very strong rural program that worked well by sending all the 5th-year Medical Students to a rural hospital where they would have spent two weeks working on public health. Much was learned during the 3-year period of February 2006 to June 2009, when we attracted funding and published papers and projects.

In July 2009, I took unpaid leave to move to Saudi Arabia to work at the College of Medicine, Department of Family and Community Medicine, University of Dammam. My main responsibility was to be teaching and to write projects to attract funding. One of the large projects, funded by Al-Ahly National Bank (ANB), was a clinical trial to compare two methods of treatments for breast cancer, namely "Intraoperative radio therapy vs. post-operative radio therapy". The other projects were eye projects funded by AL-BASAR International Foundation, which conducted surveys in poor countries on vision acuity. I was the consultant to conduct these surveys at Niger and Sudan and I still continue am still working on one project in Bangladesh.

In July 2014 I moved from University of Dammam (formerly, King Faisal University) to Mohammed Bin Rashid University, Hamadan Bin Mohammed College of Dental Medicine in Dubai, Mohammed Bin Rashid University, where I have gained a greatly different experience. I had first received an invitation to work on attend as a locum position during the summer of ..(Amar put the date) to help dental postgraduate students with their research and follow up with ing two visits organized by Professor David Wray, the ex-Dean of the College, who had attended my classes many times and asked me to join the staff on a permanent basis. I moved to Dubai and enrolled in a project funded by Al-Jalila Foundation, namely "Gestational Diabetes - a novel model for investigating the genetic and environmental components of Type 2 Diabetes Mellitus: A Proof of Principle". My contribution to with residents in their research projects provided is added me new dimension in oral health and epidemiology of oral health.

Epidemiological Laboratory (Epi-Lab)

In 1997, EPI LAB was established as a public health outreach research center initiative represented in a non-governmental, non-profit organization based in Khartoum, Sudan. The idea was brought up by the field work of the Doctoral thesis of the SNTP Manager's doctoral thesis. Epi Lab was established to address the following objectives: Support and evaluation of health programs, utilizing the successful model of SNTP to address other public health problems, strengthening research capacity and linking academia to Public Health. Since that time, Prof. Asma Elsoney (an epidemiology professor) and I myself we continue to lead and supervise Epi-lab since that time to present. And I continue to I am working there as vice executive director and head of the Epidemiology and Biostatistics section.

Under my direction responsibility and with supervision of Prof. Asma, we were able to obtain grants from WHO, World Bank, NORAD, LHLI (Norwegian Heart and Lung International), and public Health Intervention Development Scheme (PHIND). Among other development partners, our work focuses primary on TB and HIV, and non-communicable diseases such as Evolution of novel Mycobacterium tuberculosis genotypes in East Africa and clinical virulence trail assessment. Various A lot of projects were conducted by Epi-Lab, and currently now the Epi-lab is considered a Collaborative Center for of the Union and World Health Organization.

My contribution in MBRU since I joined on 13/07/2014

Since 13 of July 2014, the date that I joined MBRU I have been involved in all activities, Academic, consultation and research activities.

A. <u>Teaching:</u>

Hamadan Bin Mohammed College of Dental Medicine (HBMCDM)

- 1. CC508: Oral Epidemiology: Master of Dentistry for six Departments (Pediatric dentistry, Oral surgery, Prosthodontics, Periodontics, Endodontics, and Orthodontics)
- 2. C0502: Research Methodology and Biostatistics: Master of Dentistry for six Departments (Pediatric dentistry, Oral surgery, Prosthodontics, Periodontics, Endodontics, and Orthodontics)

Postgraduate College

- 1. MBMS7123: Biostatistics: Master of Biomedical Sciences
- 2. PHD702: Advanced Biostatistics: PhD of Biomedical Sciences

College of Medicine

- 1. MEDC 1124: Epidemiology and Biostatistics.
- 2. MEDC 2325: Research Method and Biostatistics.

B. <u>Research</u>

Together with my colleagues at HBMCDM, College of Medicine and the Postgraduate College supervise research of residents and students, my contribution begins early during problem definition, design of

the study and continue till the result of the project published. The following are the title of the projects that I have been involved or my involvement still going on:

Master of Science Orthodontics, HBMCDM, MBRU, 2016

- 1. Fadi Iyad Elshafee: Occlusal outcome assessment of orthodontic treatments performed at an educational institute in Dubai, completed 2016.
- 2. Moaza Ghuloom Mohammad: Tooth size discrepancy characteristics among a group of Emirate schoolchildren, completed 2017
- 3. Mahmoud Dastoori: Anterior teeth root morphology prediction as derived from e-models: A comparative study of plaster study casts and CBCT images, completed 2017.

Master of Science Periodontology, HBMCDM, MBRU, 2016/2017

- 1. Shatha Alkhatri: To study the influence of the frequency of maintenance on implant Success, completed 2017
- 2. Khawla Almatrooshi: The influence of periodontal treatment on blood glycemic level of diabetic patients, completed 2017
- 3. Taha Abdulla: The Prevalence of Periodontal Diseases among diabetic Patients in Local Health Centers in Bahrain. Under process
- 4. Leena Alsalihi: The Prevalence of Periodontitis in obese adults in the Kingdom of Bahrain. Under process
- 5. Sireen Alraeesi: Awareness of periodontal health among pregnant female in Dubai dental clinic, HBMDCM. Under Process

Master of Science Oral Surgery, HBMCDM, MBRU, 2016

- 1. Alya Al-Madani: The Pattern of Oral and Maxillofacial Injuries among Patients Attending Al-Qassimi Hospital Emirate of Sharjah-UAE, completed 2017
- 2. Asmaa Al-Hamoudi: Clinical and Radiographic Investigation of Healing of Human Extraction Sockets Grafted with Easy-Graft Material Versus Extraction Sockets Without Graft for Ridge Preservation. A Randomized Control Trial, completed 2017
- 3. Mohamed Shammakh: Incidental Findings in Maxillary and Mandibular CBCT, completed 2017.
- 4. Taghrid Mohammed Sebeeh: The importance of the quality of referred dental x-ray images to the oral surgeon, completed 2017.
